Re: **IP-Enabled Services, WC Docket No. 04-36;**
E911 Requirements for IP-Enabled Service Providers, WC No. 05-196

Dear Ms. Dortch:

On August 18, 2005, Robert Quinn and I met with Julie Veach, Christi Shewman and Nicholas Alexander of the Wireline Competition Bureau to discuss matters related to the above-referenced proceedings. Dale Morgenstern, also of AT&T, participated via conference call. In particular, we discussed AT&T's ongoing efforts to architect an E911 solution for VoIP subscribers who use the service nomadically and explained that in order to meet this requirement, it is necessary to have an inventory of all selective routers located throughout the country. Although AT&T and other entities, including the National Emergency Numbering Association, are working independently to develop a comprehensive list of selective routers, determining the location of selective routers operated by small carriers or in less populated areas has proven difficult. To this end, we recommended that the Commission require all operators of selective routers to populate in a central repository, such as Telecordia's Local Exchange Routing Guide (LERG) Section 15 database, key fields including state, county, location (CLLI code), and owner.

In a separate meeting on the same day, Mr. Quinn and I met with Colleen Heitkamp, Marcy Greene, Joseph Casey and Cynthia Bryant of the Enforcement Bureau to discuss AT&T's continued efforts to obtain affirmative acknowledgment from subscribers as required by the Commission's VoIP E911 order. Additionally, we also discussed AT&T's plan to suspend dial tone, beginning August 30, 2005, for those subscribers who have not responded by August 29. To minimize customer disruption, AT&T proposes to implement these suspensions over a three-

day period. This approach would enable a more timely restoration of service if a customer subsequently acknowledges receipt of the 911 notification and wishes to remain a VoIP subscriber.

One electronic copy of this Notice is being submitted to the Secretary of the FCC in accordance with Section 1.1206 of the Commission's rules.

Sincerely,

A handwritten signature in black ink, reading "Amy L. Alvarez". The signature is written in a cursive style with a large, stylized "A" and a long, sweeping tail that loops around the end of the name.
